 Official Paper for the County of Nye and the Town of Tonopah

SCORCHED, BUT NOT DAUNTED

Tonopah is growing today as a result of the water conflagration that again visited the town with the lower part of town was practically wiped out and fire rans rampant. However, the people of the town are meeting the situation bravely. Property has been insured for \$200,000. The fire has not damaged the water system. The people are not discouraged and are working for the future with a determination to reconstruct a big, new and better Tonopah. While hundreds were made homeless as a result of the fire, which destroyed fully one fourth of the town and houses, the situation is being met by the people as they rebuild their town.

This terrible catastrophe, which destroyed many homes and businesses, has not discouraged the people. They are working for the future with a determination to reconstruct a big, new and better Tonopah. While hundreds were made homeless as a result of the fire, which destroyed fully one fourth of the town and houses, the situation is being met by the people as they rebuild their town.

The people of Tonopah are in a state of rebuilding for the future. They are working for the future with a determination to reconstruct a big, new and better Tonopah. While hundreds were made homeless as a result of the fire, which destroyed fully one fourth of the town and houses, the situation is being met by the people as they rebuild their town.

Order will be brought out of chaos as a result of this conflagration, and the people will promptly settle down to a period of reconstruction. Let it be hoped that during the intervening period while so many are homeless that rent profiteering will not be practiced. Be kind to your neighbor and see that he or she is properly provided for and let it not be charged that extortion was attempted in one instance during the period of stress through which so many are now passing.

LET US ORGANIZE CHAMBER OF COMMERCE

The movement on foot to organize a commercial organization for Tonopah should merit the support of every person having the interest of Tonopah at heart. When the 250 substantial business and mining men and substantial residents of this town assemble at the festive board of the Elks' hall Friday night, the matter is to be discussed in all its phases, and it is to be hoped that the organization may be perfected and that officers who are live wires may be named to look after the destinies of the organization. No drones nor pessimists should be named upon the committee, but on the other hand let a bunch of real boosters be selected.

A commercial organization, when properly managed, is always a power for good in a community. Harmony accomplishes wonders when the business life of a town or city works in unity. Monthly banquets where all may get together and discuss problems of interest, bring the people in closer touch, and if any have grievances the same can be promptly ironed out and the members brought to an agreeable understanding.

With a wave of prosperity traversing the country, and with a promised revival of the great mining industry in the ascendancy, it would seem the time was most opportune for the formation of a chamber of commerce in Tonopah. We should be in position to take advantage of every opportunity that may present itself that the attention of the investing public may be called to our wonderful mineral possibilities. We should strive not only to build up Tonopah, but every outlying district in southern Nevada, and commercial organization properly directed will accomplish the desired results.

RECKLESS AUTOISTS SHOULD BE CURBED

The speed fiend is again busy and should be curbed in his wild frenzy, especially so far as it applies to within the corporate limits of the town and at dangerous curves on outgoing roads. That section of the road leading out from Main street near California street, where the curve is most pronounced, is the source of much annoyance to careful motorists and pedestrians, and the speed fiend is busy in all his lawlessness. That more accidents have occurred is only due to the fact that travel has been light and that fortune has smiled upon those who believe in keeping within the law.

Should a motor traffic officer be placed at the curve the Bureau believes that at least 20 arrests could be made daily of people who believe in tearing up the road at the rate of from 30 to 50 miles an hour. These speed fiends, in their wild desire to establish new records, in nearly every instance they fail to signal that at least three more seconds are required to stop. The cars should be provided on top of the engine must ever be on the alert to avoid collisions, and it is to be hoped that the matter will be finally settled.

Let this speeding within the city and in dangerous places be brought to an abrupt ending; let an officer be placed at dangerous points and let him be provided with a motorcycle that he may overtake the guilty and hale them before the proper courts; let substantial fines be imposed and if necessary, jail sentences, imposed upon the guilty of the reckless driving, and we will witness a little more sanity in auto driving.

REVIVAL IN MINING SEEMS ASSURED

It is pleasing to note the great activity that is manifesting itself in outside mining districts, regardless of the great activity that is in evidence in Tonopah. The barometer of the stock market, with the increased sales that are being made daily, shows that mining is again coming into its own, and as usual southern Nevada issues are the most favored. There has been a marked advance in a number of issues in the Tonopah, Goldfield and Divide districts, and the number of sales that are being recorded would indicate that a revival of mining was in the ascendancy that promises to be permanent.

Tonopah is the most substantial camp in the entire west. Its mines continue to produce in volume tonnages of splendid grade ore, and new mineral discoveries are being reported with frequency in the big mines of the district, while several smaller properties are being placed in condition whereby shipments are being made from time to time with promise that the output will be augmented in due course of development.

Goldfield, the famous gold camp of many years standing, is making a lot of noise as a result of the development company having been financed to carry its campaign of exploration by deep mining to a successful termination. The four-compartment shaft that is to be lowered to a depth of 2400 feet is being rushed into the bowels of the earth, and the prediction is freely made that long before the objective is reached some sensational discoveries will be made. Work on numerous properties is being inaugurated on a small scale and the outlook could not be more promising at this time for important developments being reported from time to time. The leasing system in the gold camp has been growing in popularity during the past year and as a result there is a happy and optimistic set of people in that community who believe that Goldfield will once again become the center of much interest in a mining way.

Manhattan, the gold camp of Nye county, is enjoying a great deal of prosperity as a result of the resumption of milling operations at the White Caps mill. The town is filling up with new residents, and if conditions continue to improve it will only be the matter of a short time until more homes will have to be

provided. A number of companies have either started work, or are making ready to do so, while miners who prefer to operate under the tribute system are prosecuting development with gratifying results, and it is almost assured that the production from the district for the last half of 1922 will be heavier than during any similar period in several years.

Argentite now looks like a real winner as a result of three mines having been developed to the shipping stage, with other prospects showing great promise. Had development of this district not been retarded through inaccessibility no doubt it would today be the scene of great activity. However, the cutoff road from Cave Springs by way of East Lake valley, is nearly completed and those interested in the new district are in an optimistic frame of mind and are preparing for a campaign of exploration of the mineral resources that promises to be prolific of results.

Other districts, such as Silver Peak, Stimler, Gibraltar, Stone cabin, Round Mountain, Silver Bow, Arrowhead, Eden creek, Effort and Belcher, are active, and with a general revival of business conditions, throughout the nation in evidence, as the signs now indicate, southern Nevada will become one of the greatly favored investment spots of this country.

MENACED BY DEATH CRIPPLE CAN RUN

PARIS, Aug. 22. A miracle for which Lourdes, in some quarters, is given credit, is reported from Macon. A pilgrim train bound for Lourdes was waiting in the station at Dijon and several pilgrims had crossed the tracks to the refreshment room when the whistle called them back. Among them was a paralyzed man who could only move with difficulty, even with the aid of two crutches. As he was between the rails on his way back an express train was seen to be entering the station. A cry of horror went up from those who saw his dangerous position, but the man, who had hobbled half way across with his crutches, now put them under his arm and ran for safety, escaping what seemed certain death.

Remember the job printing department of The Bonanza is the most complete and up-to-date in the state of Nevada. No reservations or exceptions to this statement.
